SIEMENS

First CompTIA RFID+ Certification Training successfully organized in Siemens Training Center, Singapore

Siemens Pte. Ltd. Automation & Drives, global market leader in industrial automation, together with RFID4U, world leader in RFID learning solutions have successfully organized the first RFID vendor-neutral training gearing towards achieving CompTIA RFID+ certification in Singapore.

Sunnyvale, CA & Singapore, February 06, 2007- Around 17 participants from different companies coming from various countries in Asia Pacific (Singapore, Thailand, Sri Lanka, Hong Kong and Taiwan) attended the CompTIA RFID+™ certification training in Singapore from 23-26 Jan (1st batch) and from 30 Jan – 02 Feb (2nd batch). During the 4-days training, participants learned about different RFID technology, implementation and troubleshooting of RFID systems and the different standards and regulations available.

At the end of the training, participants took the 1.5 hours CompTIA RFID+ exam to prove that they have acquired broad base of knowledge and competency in RFID technology. CompTIA RFID+ certification is an internationally recognized validation of the technical knowledge required for RFID professionals.

Senior Director and Instructor Eva Zeisel, RFID+ from RFID4U created an open, friendly learning atmosphere and successfully trained all participants to pass the CompTIA RFID+ exam.

"Though it is just a 4-days course, I've learnt a lot on RFID technology and its workings and these can help me a lot on my work" said Ms. Ng Swee Noi from Ngee Ann Polytechnic Singapore.

"RFID systems are complex, and difficult to install and integrate because unpredictable variables can occur at any stage of the deployment," said John Venator, president and chief executive officer, CompTIA. "The more experienced, trained and certified the RFID team, the better they will be able to overcome any challenges, and deliver the highest-quality RFID service to customers."

Congratulations to all participants who passed the exam and became RFID+ certified professionals.

Next CompTIA RFID+ certification training will be held again in Singapore in March.

About RFID4U

RFID4U™ is a worldwide leader in vendor neutral and vendor authorized RFID learning solutions. RFID4U's RFID+ curriculum as well as RFIDQ™ practice tests for RFID+ have been reviewed and approved by the Computing Technology Industry Association (CompTIA) as quality training materials through the CompTIA Authorized Quality Curriculum (CAQC) program. This recognition identifies these courses as meeting the strictest quality standards set by CompTIA to ensure it meets exacting requirements with regard to complete coverage of exam content as well as excellent content layout and instructional design material that helps certification candidates judge their learning and readiness for the certification exam. RFID4U is CompTIA Learning Alliance partner, CompTIA RFID+ cornerstone committee member, EPC global member, AIM Global member, TI Team Tag It member and Microsoft RFID council member.
